

## CARE FOR GRANITE COMPOSITE SINKS

Rinse the sink thoroughly to remove any stuck-on dirt and debris with clean water and a soft clean cloth for problematic spots.

Mix a solution of vinegar and water in equal parts in a spray bottle. Spray the sink and gently scrub with a soft, clean cloth.

Rinse the sink again with clean water.

Make a paste of baking soda and water and apply it to stubborn stains. Gently scrub the paste in with a soft, clean cloth and rinse with warm water.

Wipe the sink with a dry clean towel.

A small amount of mineral oil may be used for surface shine/finish

## ABOUT GRANITE COMPOSITE SINKS

Approximately 80% solid granite/quartz, material features the touch and feel of natural stone

Color all the way through

Highly *resistant* to scratching, staining and all household acids and alkali solutions

Heat resistant up to 500° F

Extremely hygienic, does not absorb odors or bacteria
