

PREMIER'S APPROVAL CHECKLIST:

Job Name: _____ Estimate #: _____

*Premier will NOT proceed with fabrication until this checklist is signed. Premier will cut to the template drawings. **Please ensure you have looked the drawings over.***

- DID YOU CHECK YOUR CORNER RADIUS/RADI?** (A radius (R) = corner; edge style = how the front of the top is finished. Premier uses these definitions and will cut accordingly.) **If it is not noted on the template drawing, outside corners = 1/2" R, inside corners = 3" R.**
- DID YOU CHECK YOUR **COLOR**?
- DID YOU CHECK THE SINK REVEAL? (If not otherwise noted, Premier defaults to manufacturer's specs, cutting for overhang whenever possible on standard undermount sinks and reveal on farm sinks or sinks with a rounded top edge. It is your responsibility to pick out a topmount sink or undermount sink according to your preference.)
- DO YOU UNDERSTAND RISKS AND YOUR RESPONSIBILITY FOR TOUCH-UPS?** If Premier is handling the tearout, **DO YOU UNDERSTAND** added **TEAROUT RISKS**, material **thickness** differences, and extra work that may be required on your end after countertop installation? Although Premier will take the utmost care in all tearouts and installations, scratches, nicks, dings, and scrapes to surrounding surfaces are normal parts of stone installation and considered incidental damages that may require touch-ups on the homeowner's end. **TEAROUT:** Premier cannot be held liable for how the existing tops were originally installed, nor how the existing tops come off. Tops will likely break during the tearout process and are not the responsibility of Premier. Cabinets may also sustain minor damage which may require touch-ups that are the homeowner's responsibility. **ALL FIXTURES STILL ADHERED TO THE TOPS WILL BE THROWN OUT.** Please have all fixtures to be kept removed prior to our arrival or be sure to note to your CSR prior to signing this checklist if there are any fixtures you would like to keep.
- DO YOU UNDERSTAND THAT** appliances **MUST** be removed prior to install if requested by Premier? If you were requested during approval to remove your stove/fridge and they are not removed when Premier comes to install, our installers will not proceed until it is removed. You are then responsible for a return trip fee and subject to Premier's scheduling to return. If you request Premier to handle any appliances (**PREMIER DOES NOT REMOVE COOKTOPS. THOSE MUST BE OUT AT ALL TIMES**), you waive any right to hold Premier responsible for any damages to the appliance or its surrounding area(s) and you will be charged a **\$75** appliance moving fee **PER APPLIANCE**.
- DISHWASHERS** are the homeowner's responsibility to secure or re-secure. Dishwashers need to be fastened to the cabinets with mounting brackets (often supplied with the dishwasher or purchased from a box store or supplier). If Premier is handling the laminate tearout, we will provide a new bracket to accommodate the new tops.
- If you are getting an alternate finish like honed, leathered, brushed, etc. (anything other than polished), **DO YOU UNDERSTAND THE EXTRA CHARACTERISTICS, MAINTENANCE, AND care OF YOUR STONE?**
- DID YOU CHECK YOUR OVERHANGS**, especially on islands and peninsulas? **Blue = cabinets, Red/Orange = countertops.** For example, if you want sitting-area overhangs on two sides of your island, does the print reflect this?
- DID YOU CHECK YOUR SINK *STYLE* and *LOCATION*? (We make sure the measurements are correct based on the existing plumbing or sink base, but sometimes people want their sink centered with a window instead, for example, or are planning on moving their plumbing. Does the drawing reflect any special requests you may have regarding this?)
- ARE ALL THE **details** AND **REVISIONS** (found near the bottom of the estimate) **NOTED ON THE ESTIMATE CORRECT?** (For builders/designers/dealerships, where applicable)
- DID YOU ASK FOR **CLARIFICATION** ON ANYTHING YOU ARE UNCLEAR ABOUT?
- ARE YOU AWARE that if your surface requires a seam, you **WILL** be able to feel and see the seam? Seams in stone **cannot** be polished/"sanded" out. There may be ridges along the seam that will not exceed 1/32".
- Premier values quality, but we are a company that employs humans. Mistakes can happen, and, should an issue arise, Premier will do everything we can to resolve it in a timely manner and work with you to come up with an acceptable solution to ensure satisfaction of your new surface(s).

*Please let your designer or Premier know if something isn't right or needs to be changed. **By signing this sheet, you indicate that you understand and agree to all boxes on the checklist, you agree that the post-template drawing and details are correct, and you are ordering the tops to be cut per the template drawings and estimate details.**
